

CINNAMARA COLLEGE
CINNAMARA, JORHAT-8

Report on Institutions Facilities for Waste Management

The buildings and the surrounding area in the campus are cleaned every day by the grade-IV employees of the college. The garbage collected are put in the dustbin. Solid waste is segregated as degradable and non degradable waste. Degradable waste are kept in green dustbin and non degradable waste are kept in blue dustbin. Degradable waste from college canteen and hostel are dumped in the vermicomposting unit to produce organic fertilizer. Non degradable waste is disposed off in the municipal dumping ground. Rain water is stored in the Rain water harvesting system. The sewage water from toilets, canteen and hostel is disposed to the main drainage system. E-waste like outdated computers, batteries and other accessories are disposed off for resale, reuse and recycling.
